GATHERING WITH ART

Village Underground (VULX) is an international platform for culture and creativity. Created in London in 2007, launched in Lisbon in 2014. An open village that promotes cultural intervention, focusing on street culture - music, street art, food and playfulness. A wall always on the look out for a new artistic movement and a constant cultural revolution.

GATHERING WORK WITH INSPIRATION

VULX has an original architectural structure where shipping containers gain a second life as work& art residencies, two buses become a restaurant and a boardroom for unique meetings. Next to them lays a half-pipe for skateboarding. VULX is already a symbol of Lisbon architecture and has become a creative community in the city.

A COMMUNITY OF ARTISTS, CREATIVES AND START UPS

The containers gather the ideal conditions for those who work there. A space surrounded by creativity and where you want to be every day. Where work meets pleasure.

Book your space, become a villager at our Residencies and join our Community.

- Event space, workshops, exhibitions
